## Feature highlights

### 1 Liquid-cooled system

Industry-leading cooling system: battery, inverter, on-board charger and motor are liquid-cooled. Liquid cooling offers a more efficient cooling process, optimizing charging speed and performance in almost any conditions compared to an air-cooled system.

### 2 10.25 In. Touchscreen display with BRP Connect and Apple Carplay

A high-resolution infotainment system that puts an interactive, informative and customizable experience that's both seamless and simple, right at your fingertips.

### 3 Chaincase

The chaincase protects the high-quality silent chain from the elements and keeps it lubricated with oil. An automatic tensioner ensures perfect chain tension without the need for regular maintenance.

### 4 Passive and Active Regen

When the accelerator is released, Passive Regen gives back some energy to the battery while decelerating. Active Regen gives up to 4 times more power to the battery and offer greater deceleration. Both Regen can be adjusted depending on your preference.

### 5 Lightweight architecture

The battery is an integral part of the chassis, reducing the number of parts and the overall weight of the motorcycle, making it very agile and easy to handle.

### 6 Pulse '73 package

Premium package with exclusive coloration, trims and additional features such as a LinQ Gauge spoiler and Signature LED lights.
